**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-19 and 23-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 11, it is not clear whether “the acknowledging by the source to the destination” is referring back to lines 5-6 “acknowledged by the destination to the source” since the terms “source” and “destination” have been flip-flopped. If not, then the phrase lacks a proper antecedent basis.

Claim 8, line 14, “the acknowledging by the source to the destination” is objected to for the same reasons as above.

Claim 14, lines 10-11, “the acknowledging by the source to the destination” is objected to for the same reasons as above.

Claim 23, line 11, “the acknowledging by the source to the destination” is objected to for the same reasons as above.

***Allowable Subject Matter***

3. Claims 20-22 is allowed.
4. Claims 1-19 and 23-29 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Art Unit: 2663

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to anticipate or make obvious the feature of "managing acknowledgments of the retransmission of the packets within the subpath by a mechanism that is independent of the acknowledging by the source to the destination with respect to the transmitting of the packets over the network path," wherein the examiner assumes "the acknowledging" phrase to be by the destination to the source; and the feature "a mechanism configured to transmit packets stored in the first storage mechanism to the second side based on duplicity of acknowledgments included in the second storage mechanism."
